To whom it may concern

Dear Sir/Madam,

**Release of Code of Practice for Hong Kong LPG Industry,
Module 2 (Issue 2)**

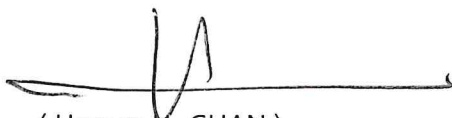

The Code of Practice for Hong Kong LPG Industry, Module 2 (COP M2), was promulgated by EMSD to provide an outline of safety standards, guidelines and best practices for design, installation, testing and commissioning, operation and maintenance of underground LPG pipework.

In order to capture the changes in technologies, international standards and to incorporate the experiences of the stakeholders of the Hong Kong LPG Industry over the years, after collaboration with them, the COP M2 has been updated and released in May 2024.

The COP M2 (Issue 2) is available at EMSD's website:

https://www.emsd.gov.hk/en/gas_safety/publications/codes_of_practice/index.html

Yours faithfully,

(Horace H. CHAN)

for Director of Electrical and Mechanical Services

(EMSD's website for COP
by Gas Standards Office)
