All Registered Examiners

Dear Sir,

Circular No. 2/2014
Test and Examination of Tower Working Platform

According to Section 9(p) of the Builders' Lifts and Tower Working Platforms (Safety) Ordinance (Cap. 470) (the "Ordinance"), you, as a Registered Examiner, shall ensure that all structural and mechanical components of tower working platform (TWP) under your test and examination are kept in a proper state of repair. In carrying out the test and examination as required under Sections 18, 20 and 22 of the Ordinance, you are reminded that the examination of all machinery and equipment of TWP should include the examination of its structural and mechanical components, including but not limited to the connection joints between the lifting cage and platform sections and between platform sections. They should be checked for any sign of excessive wear and tear, corrosion, deformation, crack or dislocation to ensure that the TWP is kept in safe working order and a proper state of repair. Results of the checking should be recorded in the examination report.

If you have any queries regarding the above, please feel free to contact our Mr. SIU Kim-hung on telephone number 2808 3547 or the undersigned.

Yours faithfully,

(LEE Hok-yin, Arthur)
for Director of Electrical and Mechanical Services
